Our experience, Your solution

Overview

AE Switchboards is a proudly South Australian family owned company. Our operations are based at a modern facility in Lonsdale, South Australia and we have a long history of delivering projects Australia wide on time and on budget.

Our expertise is the comprehensive understanding of Supply Authority requirements and local service and installation rules in all states and territories.

What we do

Our range of switchboards include Distribution, Motor Control, Multi Metering, Supply Authority Service Fuse Enclosures, PLC Marshalling, Network and Grid Protection for Solar, and Power Factor correction panels. Each project we undertake is structured specifically to meet the needs of our clients with the key to the success of our business being the continuous delivery of high quality products and service with industry best lead times.

Our People

Our strength is our people – dedicated professionals with vast knowledge and experience in the switchboard building industry and a commitment to maintaining the highest standard and the best solutions for our customers. We will help you through the entire process from site visit, through the design process and on to installation and commissioning.

Our Service

We utilise a modular building process which enables quick delivery and turnaround from accepted drawings, generally within four weeks but often faster. Our switchboards are tailored to meet your specific project requirements and designed to fully comply with AS/NZS 61439 standard and Supply Authority Service Rules.

Management Systems

AE Switchboards ensures our systems and processes are industry leading and our commitment to quality, safety and the environment is second to none. Our Quality System is fully third party accredited to ISO 9001, our Safety Management System to ISO 45001 and our Environmental Management System to ISO 14001. We only utilise quality, approved switchgear and control equipment to ensure technical suitability, reliability and conformance to specification.
